**PPRMBH**  
Prichard periosteal, modified, titanium handle

**PH2MBH**  
Hourigan periosteal, modified, titanium handle

**P20MBH**  
Periosteal, titanium handle

**PMB1**  
Sinuslift Instrument Nr. 1, titanium handle

**PMB2**  
Sinuslift Instrument Nr. 2, titanium handle

**SM67**  
Microsurgical scalpel blade, reduced no. 15 pattern

**SM69**  
Microsurgical scalpel blade, double-sided

**IMDIN13**

**... the ideal organizing system for your  
periodontal micro-surgical kit  
according to PD Dr. M.B. Hürzeler**

#### **IMS-Cassette as Instrument Tray**

An instrument tray is indispensable for a longer life of these high-quality precision instruments. To preserve their precision and resistance to wear they should not come into contact with each other during transport and sterilization.

#### **IMS-Cassettes - an integral part of the IMS**

IMS-Cassettes are essential elements of our Instrument Management System (IMS). They are designed to hold instruments well-arranged from chairside to cleaning, to sterilization, to storage, and back to chairside with minimum handling and exposure. A maintenance cycle which makes instrument management as easy, safe, and hygienic as it can be.

Hu-Friedy's IMS products, designed to be combined, represent a complete, safe and efficient Instrument Management System.
